## **November Nuggets - November 14**

*The following was sent to KYAE listserv.*

### **2014 GED® math is possible!**

For the 2014 GED® high school equivalency level, don't stress over the advanced math. As the Assessment Guide for the 2014 GED® test states, the math needed for the 2014 GED® test is primarily the math skills introduced in the middle grades and mastered in high school. Instructors of entry-level college mathematics "value mastery of fundamentals over a broad, shallow coverage of topics."

For those who need a final push to pass the math test, please note that most are only 2 -3 questions away from passing. GED Testing Service has already published a list with the items most often missed, [click here to view](#). Some of these are the same items that were also most often missed on the 2002 GED® test.

**For more information about this topic, contact Rae Smith at [rae.smith@ky.gov](mailto:rae.smith@ky.gov).**
